
WHITEPAPER V1 / 26

INTRO

Welcome to Grand Cash Auto

We all love Grand Theft Auto - and who doesn't love making money? So why not combine the two?

With Grand Cash Auto, we're building a unique community-driven project that will organize exciting tournaments and competitions with real cash prizes when GTA VI Online launches.

In this whitepaper, you'll discover how we plan to bring this vision to life, what opportunities our community will offer, and how you can take part in both free and paid tournaments in the future.

HOW IT WORKS

When designing our tournaments and competitions, we use GTA V Online as our blueprint. The game already allows players to create custom Deathmatches, races, and missions, with up to 30 players competing against each other.

In a Deathmatch, for example, players compete on a custom map with individually defined rules. The player with the most kills wins. Or take a custom racing event: the community chooses the track, vehicles, and rules. Whoever sets the fastest time takes the victory. The possibilities are virtually endless!

Now imagine these game modes with real cash prizes on the line!

The community decides on the maps, race tracks, and game rules. A Grand Cash Auto team member creates the online session, configures all the settings, and acts as a referee to ensure a fair and smooth competition.

Up to 30 players compete against each other. Depending on the game mode, the top 5 or 10 players receive cash prizes. In larger tournaments, the best performers qualify for the next round, progressing through multiple stages and prize tiers until they reach the grand final.

But that's just the beginning!

We have big plans: From individual competitive sessions to massive tournaments featuring thousands of participants, the possibilities are endless. We envision both free-to-enter tournaments with sponsored prize pools and paid competitions where participants contribute their own entry fees.

Our goal is to offer a wide variety of game modes, competitions, and tournament formats, ensuring there's something for every GTA fan.

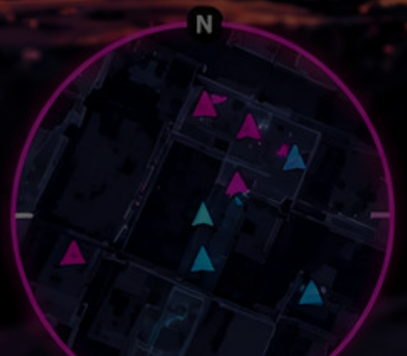

Grand Cash Auto aims to become a platform where gaming turns into real competition - and skill turns into real rewards.

TOURNAMENT EXAMPLE

Let's illustrate the concept with a practical example. Imagine the community organizes a Deathmatch tournament with 300 participants, where approximately 30 players will walk away with cash prizes.

Round 1 - Qualification

All 300 players are divided into 10 separate sessions, with 30 players competing in each session. The top 6 players from each session advance to the next round.

Round 2 - Semi-Finals

We are now down to just 60 players, competing in two sessions of 30 players each. This time, only the top 15 players from each session advance to the grand final.

Round 3 - Grand Final

The remaining 30 players compete for their share of the prize pool. Every position comes with a different cash reward, meaning the higher you finish in the rankings, the bigger your payout.

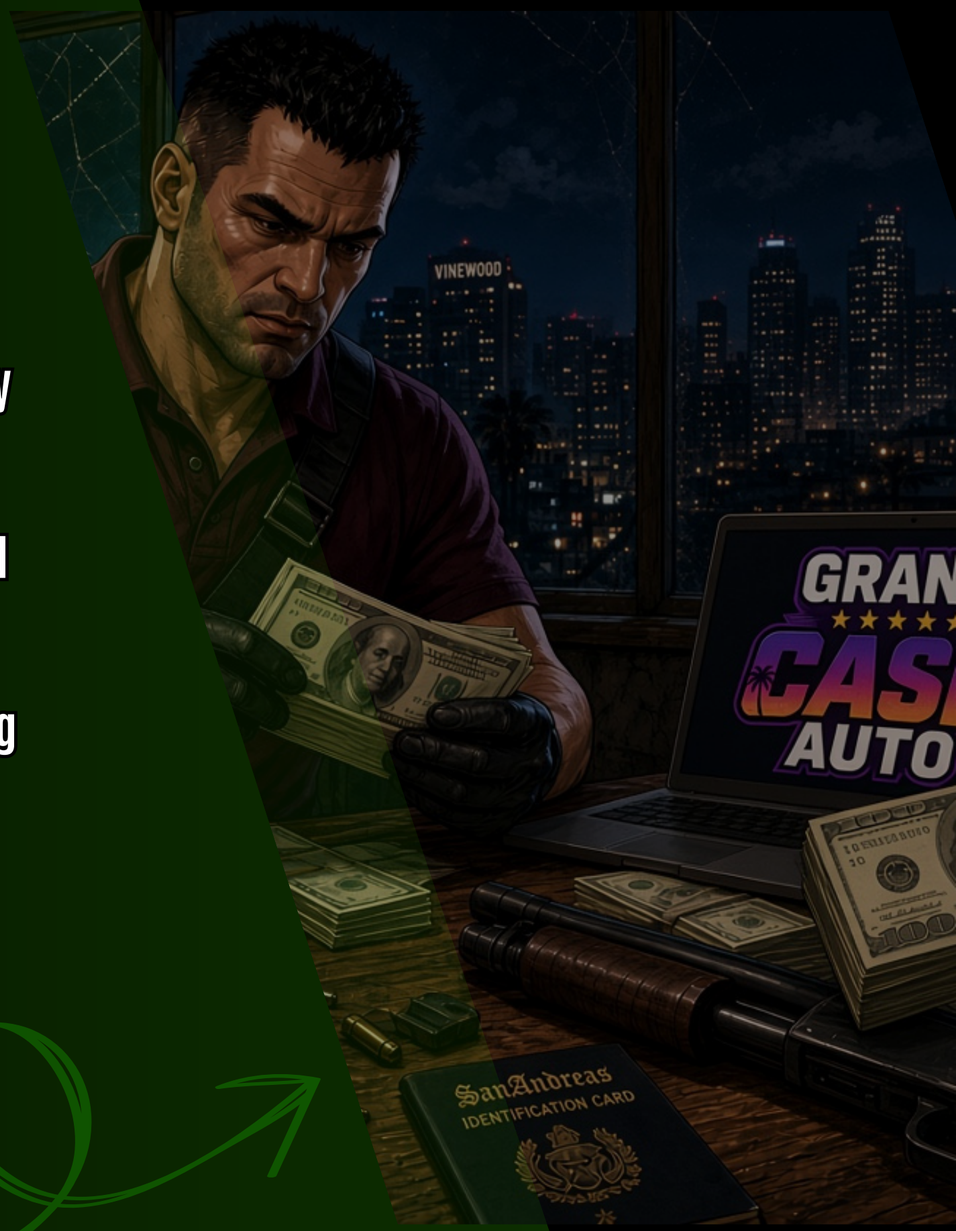

DO I HAVE TO INVEST MONEY?

You don't need to spend any of your own money to participate in Grand Cash Auto. You can join free tournaments at any time, with prize pools fully funded by the project.

However, if you want to participate regularly in tournaments, competitions, and individual matches, we will also offer paid formats that require an entry fee.

We plan to offer a wide range of competitions with different entry fees - starting as low as $5 and going up to several thousand dollars for high-stakes events.

Our goal is to provide suitable competitions and winning opportunities for everyone, from casual players to highly competitive gamers.

REVENUE STREAMS & GROWTH

Grand Cash Auto will build on multiple revenue streams in the future. These include marketing, sponsorships, as well as revenue generated through social media and the streaming of our tournaments and events.

Another key part of our concept is tournaments and competitions involving real-money stakes, with participation fees being charged.

All revenue generated will be reinvested directly into the development of Grand Cash Auto. It will help us continuously expand the project, increase our reach, and regularly offer the community free tournaments and competitions with attractive prize pools.

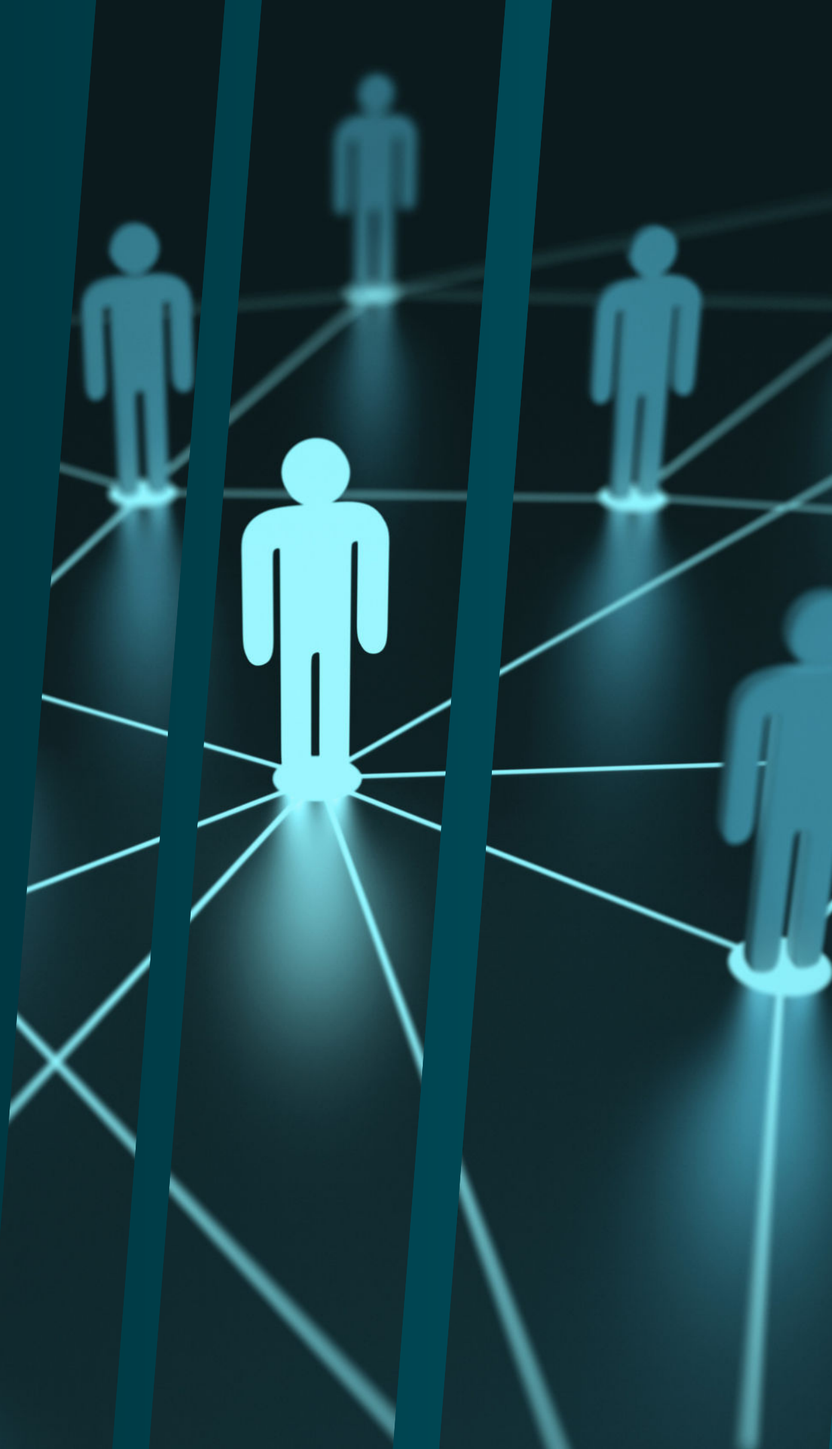

Our Goal: To build a sustainable, growing ecosystem that becomes self-financing in the long term while providing its community with more opportunities, experiences, and value.

PARTICIPATION & ANONYMITY

Joining Grand Cash Auto is simple, straightforward, and convenient - everything can be done from the comfort of your own home. We believe in maximum privacy, anonymity, and decentralization. To register for tournaments and competitions, you only need an email address and a username of your choice. No ID, address, or banking details are required.

Blockchain technology makes this possible, enabling a decentralized organization with a strong focus on privacy and anonymity.

You can easily register through our website. Simply navigate to the "Lobby" section, select your desired tournament, and submit your registration using the corresponding form.

DEPOSITS & WITHDRAWALS

All tournament entries and prize payouts will be handled exclusively through Bitcoin, USDT, or GCA6.

This decentralized payment system is a key part of Grand Cash Auto's international vision. It enables cross-border transactions without relying on traditional bank transfers, while taking advantage of blockchain technology's transparency, security, and traceability.

Players can manage their deposits and withdrawals directly through their own crypto wallets, with the flexibility to use different cryptocurrency exchanges.This gives us the foundation to build a global gaming community that values financial independence, flexibility, and privacy.

THE GCA 6 COIN

The GCA6 Coin is our very own community currency, opening up a wide range of additional opportunities for our members.

With every real-money game played within the community, the value of GCA 6 increases on cryptocurrency exchanges. This is driven by tournament fees and our integrated Buyback & Burn mechanism. The total supply is strictly limited to 100 million coins and can never be changed or increased.

GCA 6 is fully decentralized and independent. Once launched, no one can control the coin or change its fundamental rules. Security is another major strength: the smart contract achieves the highest possible score in security tests and shows absolutely no red flags.

(For more detailed information and additional links, visit our website.)

OUR GOAL

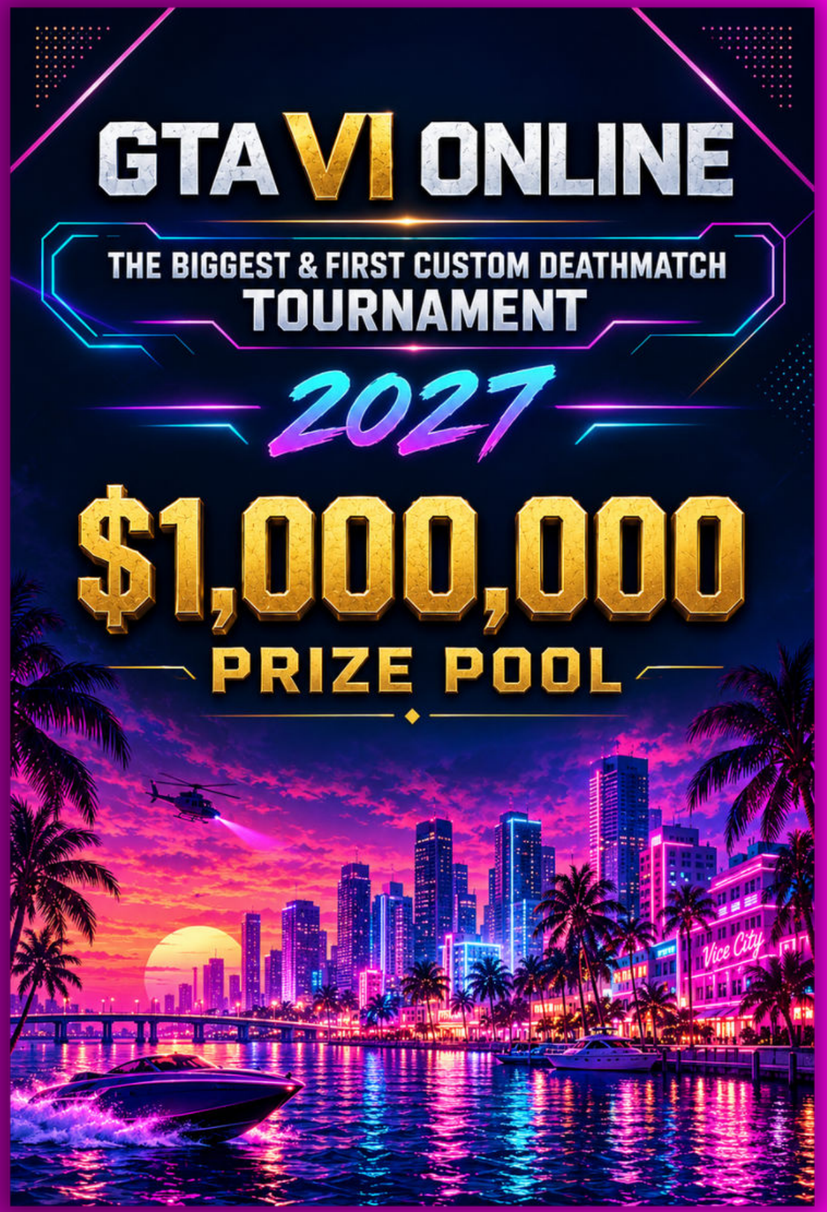

Our long-term goal is to host a free Deathmatch tournament with an incredible $1 million prize pool. (*More information about this tournament*)

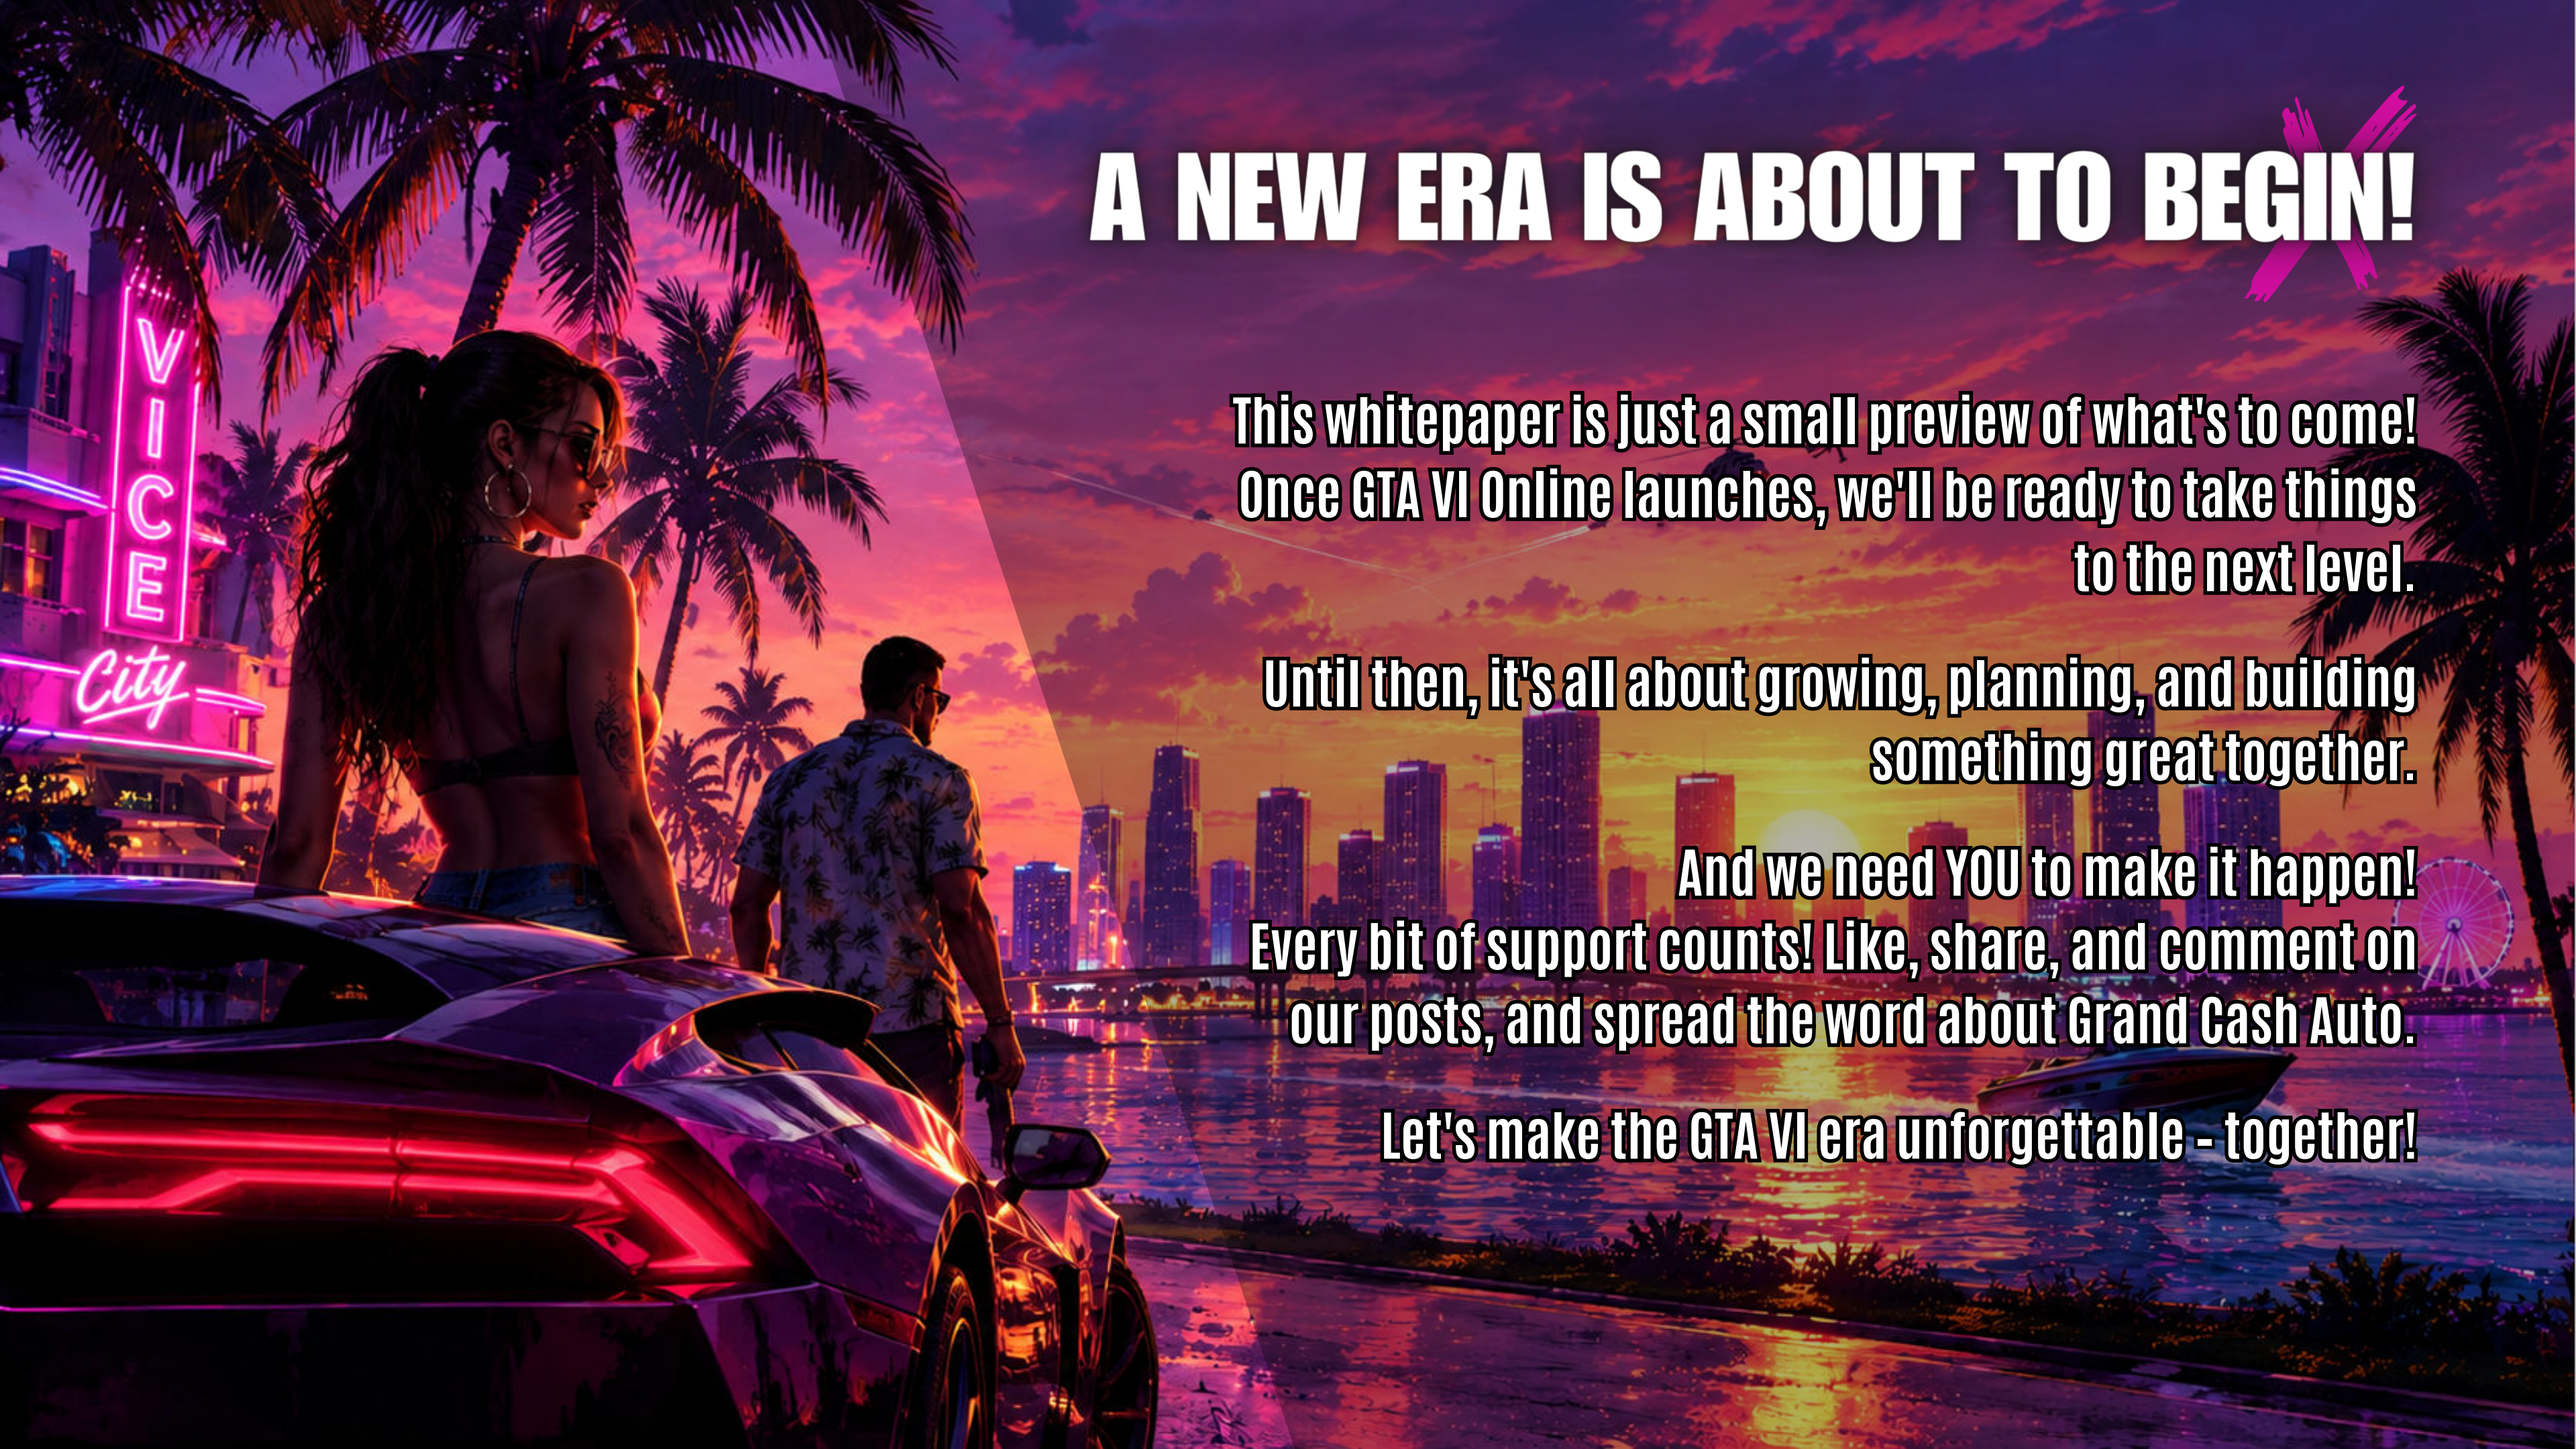

We still have a lot of work ahead of us. Along the way, we'll start by organizing smaller tournaments, gaining experience, and continuously improving our operations.

But most importantly, we need to build a strong community so we can turn this vision into reality together.

You can help us make it happen! Follow our social media channels, spread the word about Grand Cash Auto, and become part of our growing community.

Thank you for your time and interest. We hope to welcome you to Grand Cash Auto very soon!

A NEW ERA IS ABOUT TO BEGIN!

This whitepaper is just a small preview of what's to come!
Once GTA VI Online launches, we'll be ready to take things to the next level.

Until then, it's all about growing, planning, and building something great together.

And we need YOU to make it happen!
Every bit of support counts! Like, share, and comment on our posts, and spread the word about Grand Cash Auto.

Let's make the GTA VI era unforgettable - together!
